Marketing Lead
Wired2Fire, Dorking

First Class BA
3D Computer Animation, UAL

10+ years
Adobe Creative Suite

PROFILE

Creative marketer, graphic designer and 3D artist who currently heads up all marketing at Wired2Fire. I control the website, company social media, product photography, campaign graphics and product presentation, with a 3D artist's eye for visuals that sell.

A First Class graduate in 3D Computer Animation from the University of the Arts London (2023), I bring 10+ years of Adobe Creative Suite experience and a background in web development. I'm equally comfortable building a campaign, designing a product wrap, modelling in Blender or Maya, or shooting the photography to go with it.

Brand & Content
Social, photography, video, print and magazine advertising

Web & Product
WordPress and Elementor builds, plus 3D JavaScript product configurators

2D & 3D Design
Campaign graphics, vinyl wraps, and optimised 3D assets

EXPERIENCE

Marketing Lead
MAR 2025 – PRESENT
Wired2Fire, Dorking

- Lead all marketing for the business across web, social, print and magazine advertising, keeping the brand looking consistent on every channel.
- Manage the WordPress website day to day, and have drastically changed its design and functionality through extensive Elementor work.
- Assisted in creating the company's computer product configurator, which lets customers build and spec their own system online.
- Custom design vinyl wraps for the products we produce, from concept through to finished artwork.
- Manage all social media, and create the 2D and 3D graphics used in marketing activations.
- Photograph stock imagery for product listings and for magazine adverts.
- Started as System Builder / Marketing Artist; built PCs for King's College, the British Army, Wushu Studios, Stellar Entertainment and Supermassive Games.

Freelance 3D Artist / Photographer / Video Editor
SEP 2020 – PRESENT
Racecar New Media Services, Remote

- Create optimised 3D assets for web, from ideation to subdivision modelling and texturing.
- Developed a high-performance product configurator with the Google model-viewer JS library.
- Film, edit and produce interview video content.
- Photography and video for automotive and marine clients including Talacrest Classic Ferrari, Mission Prestige, Rocketeer Cars, Neil Bainbridge Engineering and Broadblue Catamarans.

Frontend Developer & Video Production Assistant
JUN 2015 – SEP 2020
Racecar New Media Services, Shere

- Built responsive, styled web pages with HTML, CSS, Bootstrap 4 and React.js.
- Designed and produced website graphics for the automotive industry, and managed content for mail campaigns and website stock editors.
- Film editing and video production; improved brand identities and social media presence for clients.
- Bespoke photography for classic automotive clients such as Tim Samways Sporting & Historic Car Engineers and Shapecraft Classic Motor Bodies.

TOOLS IN PRACTICE

WordPress & Elementor
Managing and extending the Wired2Fire website, with drastically changed functionality.

Photoshop & Illustrator
Campaign graphics, print and magazine ads, and branding for products and clients.

Premiere Pro
Interview, promotional and client video, from filming through to final edit.

Blender, Maya & ZBrush
Modelling and subdivision workflows for optimised, production-ready 3D assets.

Substance 3D Painter
Texturing and materials for product visuals, web assets and personal projects.

Model-viewer & JavaScript
Interactive 3D product configurators for web, built with Google's model-viewer library.

See the work in motion
Showreel and a selection of 3D, design and marketing projects.
